Pain points of travel

Stress, wasted time, and lost productivity before and during trips due to planning and managing logistics, unforeseen disruptions, and decision fatigue.

85% of surveyed business travelers said travel disruptions **reduced their productivity due to stress from their journey** with poor planning as the primary cause.

Over half (54%) of business travelers said they would be **more productive if time for leisure activities were integrated** into work trips.

The problem size

The average cost of lost productivity due to travel-related stress is $662 per business trip.

Travel pains waste an estimated 6–7 billion hours annually, equivalent to $120-150 billion in lost productivity globally.
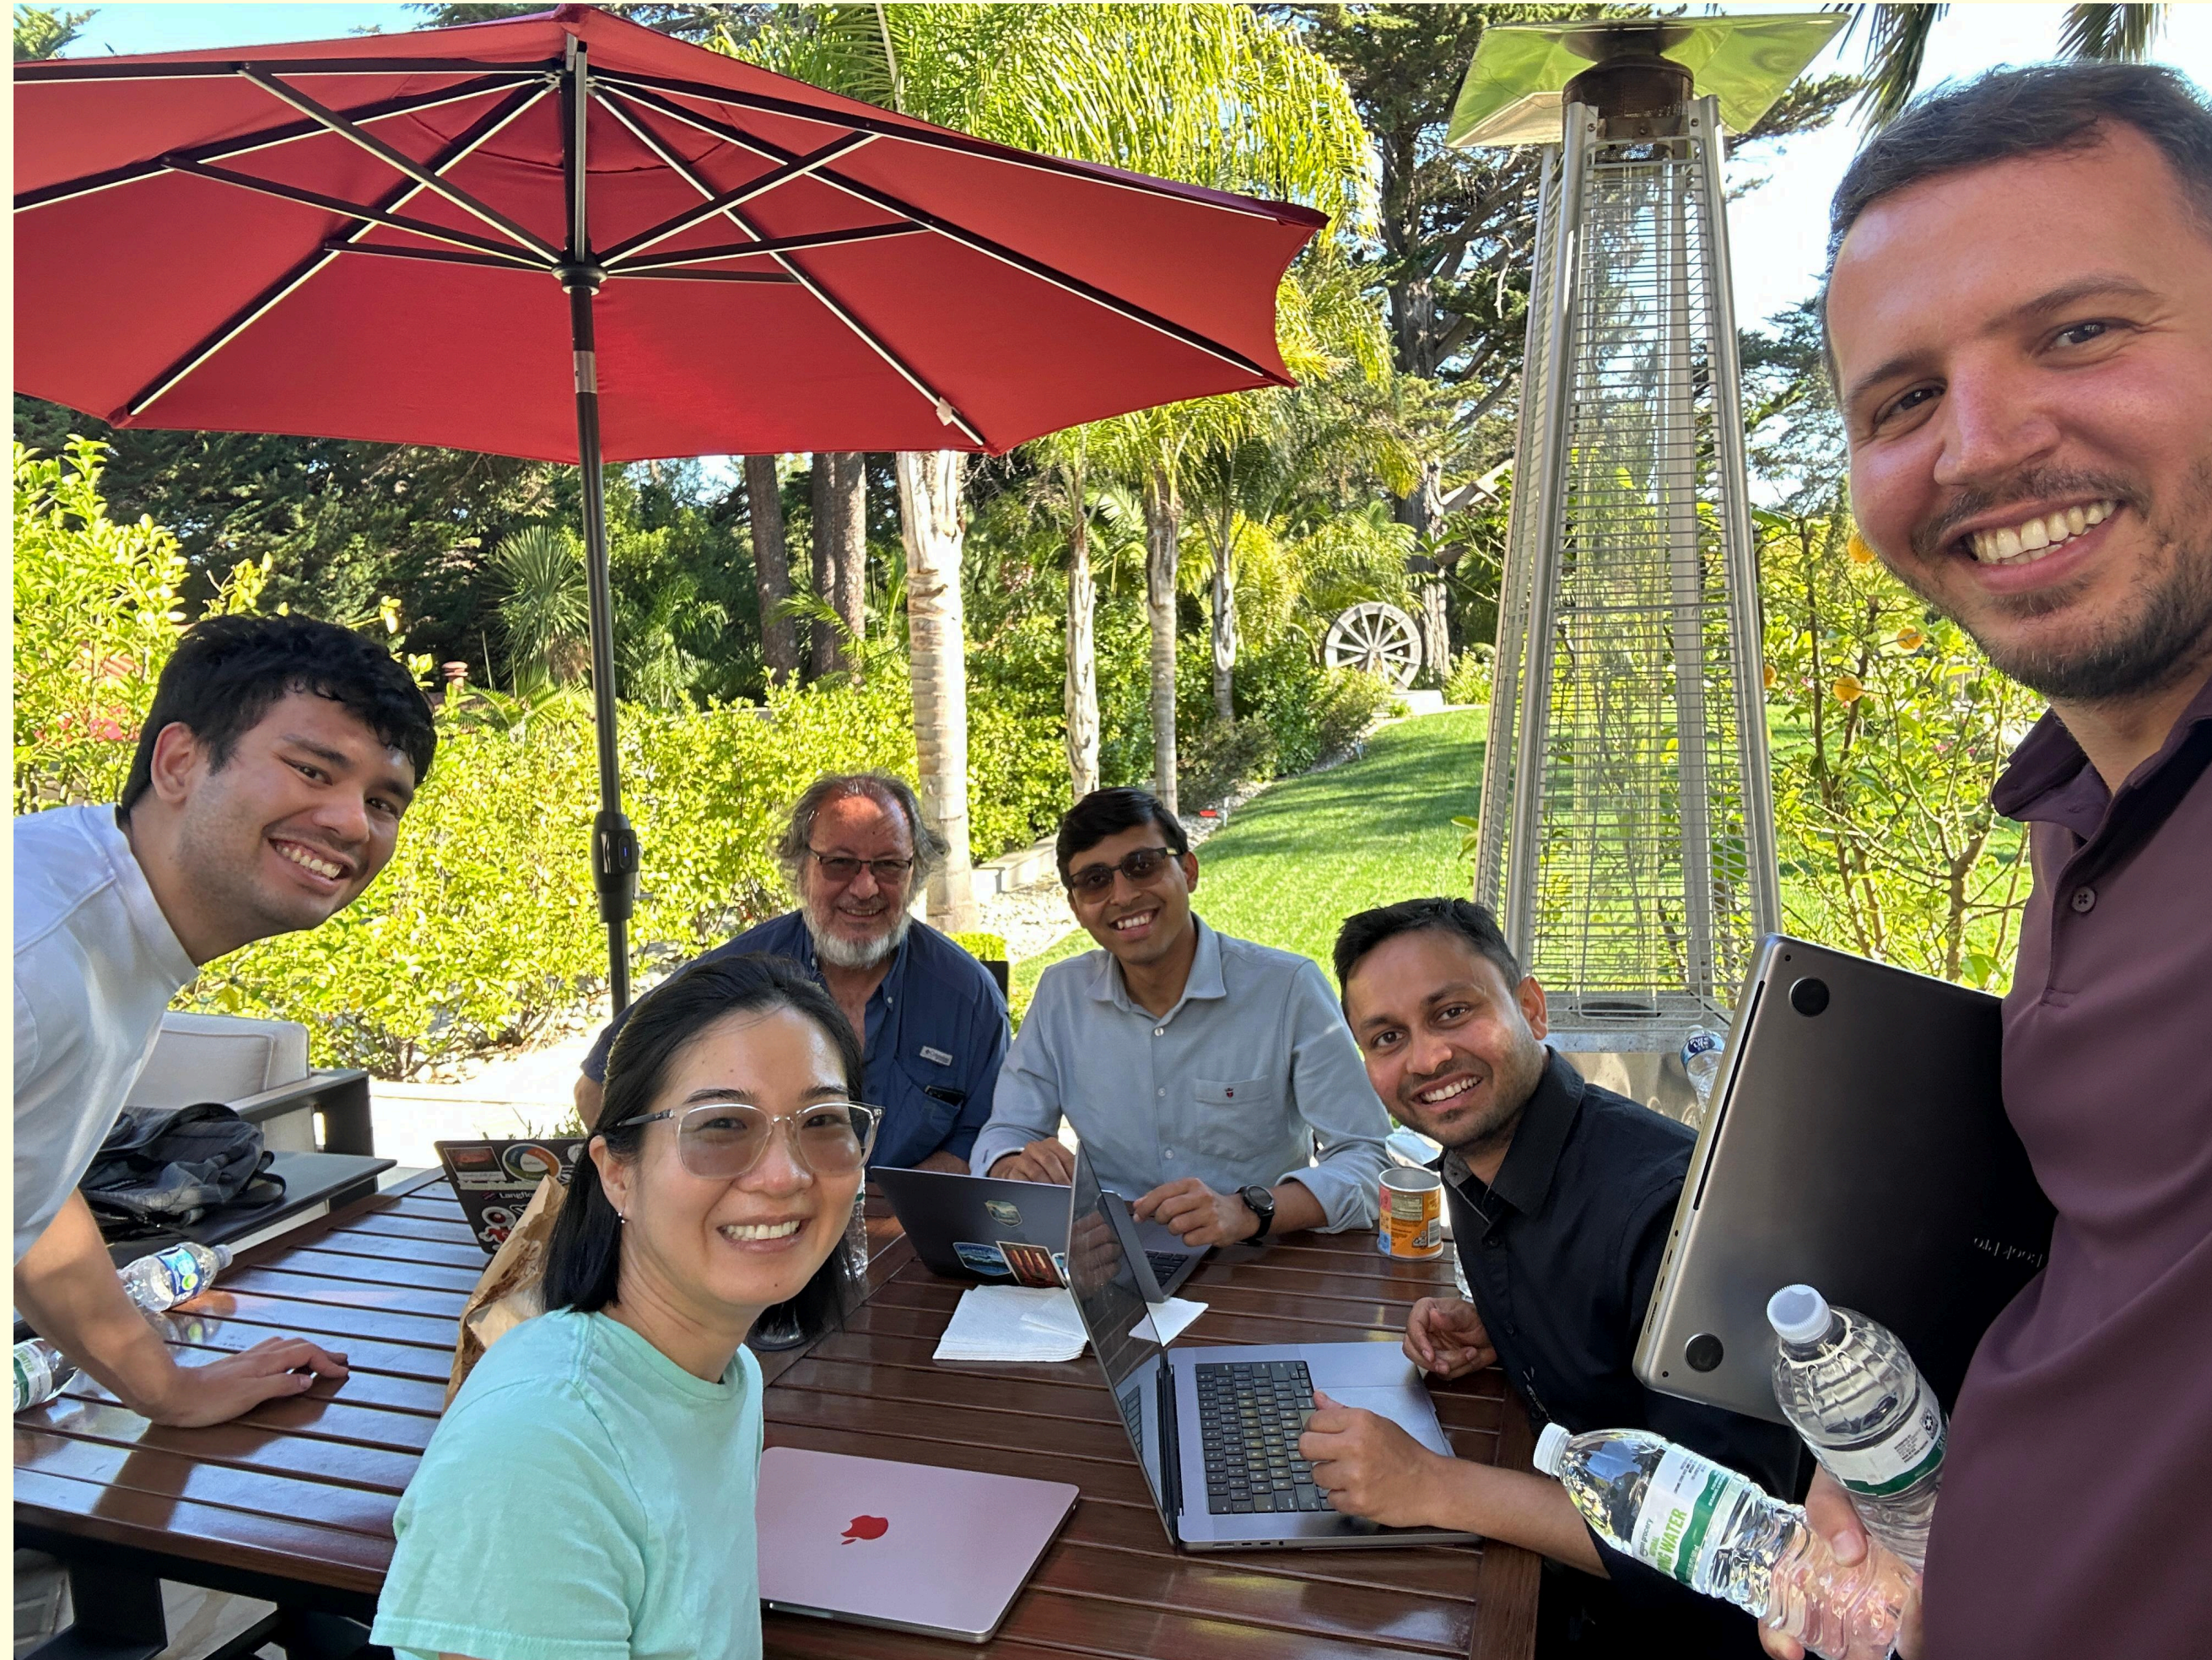

Solution

The future of travel is effortless: personalized experiences that remove mental overhead and can be adapted and optimized in real time, letting people focus on what matters.
